

PMP Premier Mortar Preserve is warranted for a period of 20 years from the date of manufacture when installed according to instructions provided by National Chimney.

Extend the life of chimneys without costly repairs!

Limited Warranty: This warranty does not cover failures due to the following:

- Improper storage, handling, installation, or application
- Fire, flood, natural disaster or any other act of God
- Plumbing leaks
- Faulty construction
- Structure settling that exceeds the material's elasticity

National Chimney's Commitment to You

If PMP Premier Mortar Preserve is proved to have failed during the warranty period set forth, National Chimney will replace the failed material FOB to its nearest distribution point. National Chimney reserves the right to inspect the job site by an authorized representative prior to the settlement of any claims.

Notification of claims must be made in writing to National Chimney upon discovery. National Chimney's sole and complete responsibility for proved material failure is as set forth in this warranty. National Chimney will not be responsible for incidental, indirect, or consequential damages including reinstallation labor. No other warranty is implied or expressed.

Questions concerning this limited Warranty should be directed to National Chimney. The user is solely responsible to determine the suitability of this product for its intended use prior to application and assumes all risk and liability in connection therewith.

PMP Premier Mortar Preserve

Your best choice for all-weather
chimney & crown protection

Keep Rain and Melting Ice/Snow from Seeping into the Masonry Below

Chimney crowns are exposed to moisture and temperature extremes which can cause cracking. Cracks will eventually funnel rain and snow melt inside the chimney damaging liners and weakening masonry. Both can be expensive to repair or replace.

PMP Premier Mortar Preserve forms a continuous and seamless coating that preserves a chimney crown for up to 20 years. It can be used to cover exterior masonry, stucco, poured concrete, pre-cast concrete, and concrete block.

Maintenance of a chimney exterior is critical for the long term safety and performance of masonry chimneys. A professionally applied sealant, along with a chimney cap, stops water penetration which will preserve the life of your chimney.

A Cost-Effective Way to Repair and Protect Chimney Crowns

PMP Premier Mortar Preserve is a proprietary blend of latex acrylics formulated to provide an elastomeric, resilient, and stucco-like finish with superior weathering characteristics.

PMP Premier Mortar Preserve offers home owners the following benefits:

- Permanently flexible crown repair & protection
- 100% weatherproof
- Maintenance free
- Neutral gray, mortar-like appearance
- 20-Year Warranty

Applies Evenly/Easily and Dries Quickly

PMP Premier Mortar Preserve is your best choice for a flexible waterproofing sealant. It comes in a 5 gallon container and covers up to 130 sq. ft. A thin coating of 1/16 of an inch is all that is needed.

PMP Premier Mortar Preserve dries quickly and is tack-free after one hour. It's weather resistant after 6 hours. And chimney crowns are fully cured after only 3 days.

When dry, the crown will have a mortar-like appearance. It will maintain its flexibility, allowing for temperature extremes without cracking or maintenance for up to 20 years.
